PROFESSIONAL PROFILE

Applied economics and data analyst based in Montréal, currently in corporate business analysis at Desjardins, with prior experience in competition economics and economic consulting. Builds models, dashboards, briefing notes and decision tools that turn pricing, infrastructure, policy and market questions into clear recommendations. Current M.Sc. thesis models residential water-meter deployment and volumetric pricing in Québec, including demand response, tariff design, CAPEX/OPEX, affordability constraints, avoided infrastructure costs and NPV sensitivity analysis. Interested in real estate feasibility, development advisory, municipal economics and place-based investment strategy.

SELECTED ANALYTICAL PROJECT

Applied Economics Project, Municipal Water Pricing & Infrastructure Economics

Montréal, QC

Master's Thesis | HEC Montréal x Réseau Environnement

2025 – Present

- Built a reproducible Python model, API and dashboard to simulate residential water-meter deployment, volumetric and block pricing, demand response, municipal revenue, cost recovery, CAPEX/OPEX, affordability constraints and NPV scenarios.
- Consolidated public data, tariff assumptions, municipal service constraints and infrastructure-cost parameters into validated scenarios, sensitivity tests, charts, case-study outputs and assumption documentation.
- Translated infrastructure, pricing and municipal-policy trade-offs into decision-ready outputs relevant to feasibility analysis, public finance, stakeholder communication and place-based economic development.

PROFESSIONAL EXPERIENCE

Analyst, Corporate Business Analysis

Montréal, QC

Desjardins

Apr. 2026 – Present

- Conduct market intelligence and corporate business analysis for personal financial services, monitoring competitor activity, customer trends, regulatory developments, strategic opportunities and emerging risks.
- Translate ambiguous business questions into structured research, opportunity framing, executive-ready materials and recommendations for senior leadership audiences.
- Support planning and strategy work by connecting market evidence, financial constraints, operational priorities and execution considerations into clear decision materials.

Intern, Regulated Industries

Ottawa, ON

Competition Bureau

May 2025 – Aug. 2025

- Analyzed regulated markets, competitive dynamics, market structure and business conduct to support evidence-based assessment of consumer and market impacts.
- Built repeatable Python and Excel workflows to clean fragmented datasets, measure concentration, validate assumptions, identify anomalies and document analytical steps for review and reuse.
- Produced leadership memos and technical documentation translating quantitative findings, legal-economic reasoning and market evidence into clear conclusions for non-specialist decision makers.

Intern, Economic Consulting & Strategy

Montréal, QC

KPMG Canada

May 2024 – Aug. 2024

- Supported economic consulting mandates involving market analysis, feasibility questions, financial scenarios, economic impacts and strategic decision support.
- Modeled scenarios and sensitivities to assess risks, trade-offs, costs, benefits and business implications under uncertainty.
- Built client-facing dashboards, research summaries and presentation materials translating complex economic analysis into clear recommendations.

Intern, Business Development

Montréal, QC

National Bank Accelerator

May 2023 – Aug. 2023

- Assessed startup business models through market sizing, competitor mapping, customer segmentation, revenue logic and structured recommendations.
- Supported business development research by translating qualitative and quantitative evidence into founder-facing and partnership-relevant summaries.
- Mapped ecosystem opportunities and commercial positioning for early-stage ventures, connecting market evidence with partnership and go-to-market priorities.

EDUCATION

M.Sc. in Applied Economics, Industrial Organization

2024 – 2026

HEC Montréal

Montréal, QC

- Thesis: municipal water pricing, infrastructure economics, tariff design, scenario modeling, demand response, affordability constraints and policy evaluation.

B.B.A. in Economics and Finance

2020 – 2024

HEC Montréal

Montréal, QC

- Distinction: GPA top 5% (Mention d'excellence); Teaching Assistant in Macroeconomics, HEC Montréal.

SKILLS & LEADERSHIP

Real Estate, Market Strategy & Municipal Economics: feasibility support, market research, pricing assumptions, absorption logic, infrastructure economics, municipal finance, public-policy analysis, stakeholder mapping, economic-development memos, competitive intelligence.

Modeling & Decision Support: NPV analysis, sensitivity analysis, scenario modeling, tariff design, cost recovery, affordability constraints, dashboarding, KPI reporting, business cases, executive summaries, output validation.

Data & Tools: advanced Excel, PowerPoint, Python, Pandas, SQL, Stata, MATLAB, R, Git, FastAPI, dashboards, data quality checks, reporting automation and workflow documentation.

Communication & Leadership: French/English, stakeholder presentations, client-facing materials, plain-language writing; VP, HEC Data Science Club.
