PROFESSIONAL PROFILE

Applied economist completing an M.Sc. at HEC Montréal, with experience at the Competition Bureau, KPMG and Desjardins. Builds models, dashboards and decision tools for pricing, demand and investment questions, and checks every number before it is shared.

APPLIED RESEARCH & PROJECTS

Applied Economics Researcher, External Consulting

Montréal, QC

Réseau Environnement | Mitacs-funded M.Sc. research | HEC Montréal

Jun. 2025 - Present

- Provide research and analytical support on water pricing and metering investment for Réseau Environnement, including projects for Laval and Longueuil, with municipal partners and HEC Montréal/ÉTS researchers.
- Built a Python economic model, API and interactive dashboard to compare tariff, investment and funding scenarios with explicit demand and cost assumptions.
- Evaluate costs and benefits over 20 years with NPV, sensitivity analysis and Monte Carlo simulation, separating municipal cash flows from broader economic benefits.
- Translate technical findings into reports, briefing notes and visual tools for municipal and academic audiences.

Retail Demand & Inventory Planning Dashboard

Montréal, QC

Independent case study | JavaScript, Python | enzosimier.com/altitude

Oct. 2026

- Built a weekly demand, stock and open-to-buy plan for five outdoor product lines on sample data, covering lost sales, sell-through, GMROI and gross profit.
- Made four buying decisions switchable (early receipt, extra buy, deferral, markdown test) so the whole plan recalculates; automated tests reconcile every figure.

Québec Labour-Market Forecasting

Montréal, QC

Selected analytical project | R and Statistics Canada data

Aug. 2026

- Forecast Québec construction employment 12 months ahead with seasonal ARIMA, validated on a holdout against a seasonal-naïve benchmark; processed 113,603 Labour Force Survey records.

PROFESSIONAL EXPERIENCE

Analyst, Corporate Business Analysis

Montréal, QC

Desjardins | Retail banking strategy

Apr. 2026 - Jul. 2026

- Researched markets and competitors for Canadian retail-banking strategy, including pan-Canadian expansion and open banking; synthesized evidence, risks and opportunities into executive presentations.

Intern, Regulated Industries

Ottawa, ON

Competition Bureau

May 2025 - Aug. 2025

- Analyzed market structure, competitive dynamics and firm behaviour to inform competition policy assessments; translated findings into concise memos for non-specialists.
- Built repeatable Python and Excel workflows to consolidate fragmented datasets, measure market concentration and validate outputs.

Intern, Economic Consulting & Strategy

Montréal, QC

KPMG Canada

May 2024 - Aug. 2024

- Modelled economic and financial scenarios, including port-sector transportation projects, to assess feasibility, investment risks and strategic alternatives; presented results in client decks and dashboards.

Intern, Business Development

Montréal, QC

National Bank Accelerator

May 2023 - Aug. 2023

EDUCATION

M.Sc. in Applied Economics (expected December 2026)

2024 - Present

HEC Montréal | Industrial organization, econometrics and optimization

Montréal, QC

B.B.A. in Economics and Finance

2020 - 2024

HEC Montréal | GPA top 5% (Mention d'excellence)

Montréal, QC

METHODS & TOOLS

Methods: Economic modelling, demand and pricing analysis, time-series forecasting (ARIMA), cost-benefit analysis, scenario and sensitivity analysis, Monte Carlo simulation, data validation.

Tools: Python (pandas), R, SQL, advanced Excel, PowerPoint; dashboards, APIs and reporting automation.

AI-assisted work: Codex and Claude Code for coding, testing and documentation, with assumptions and outputs checked by hand.
